1.Opis funkcionalnosti

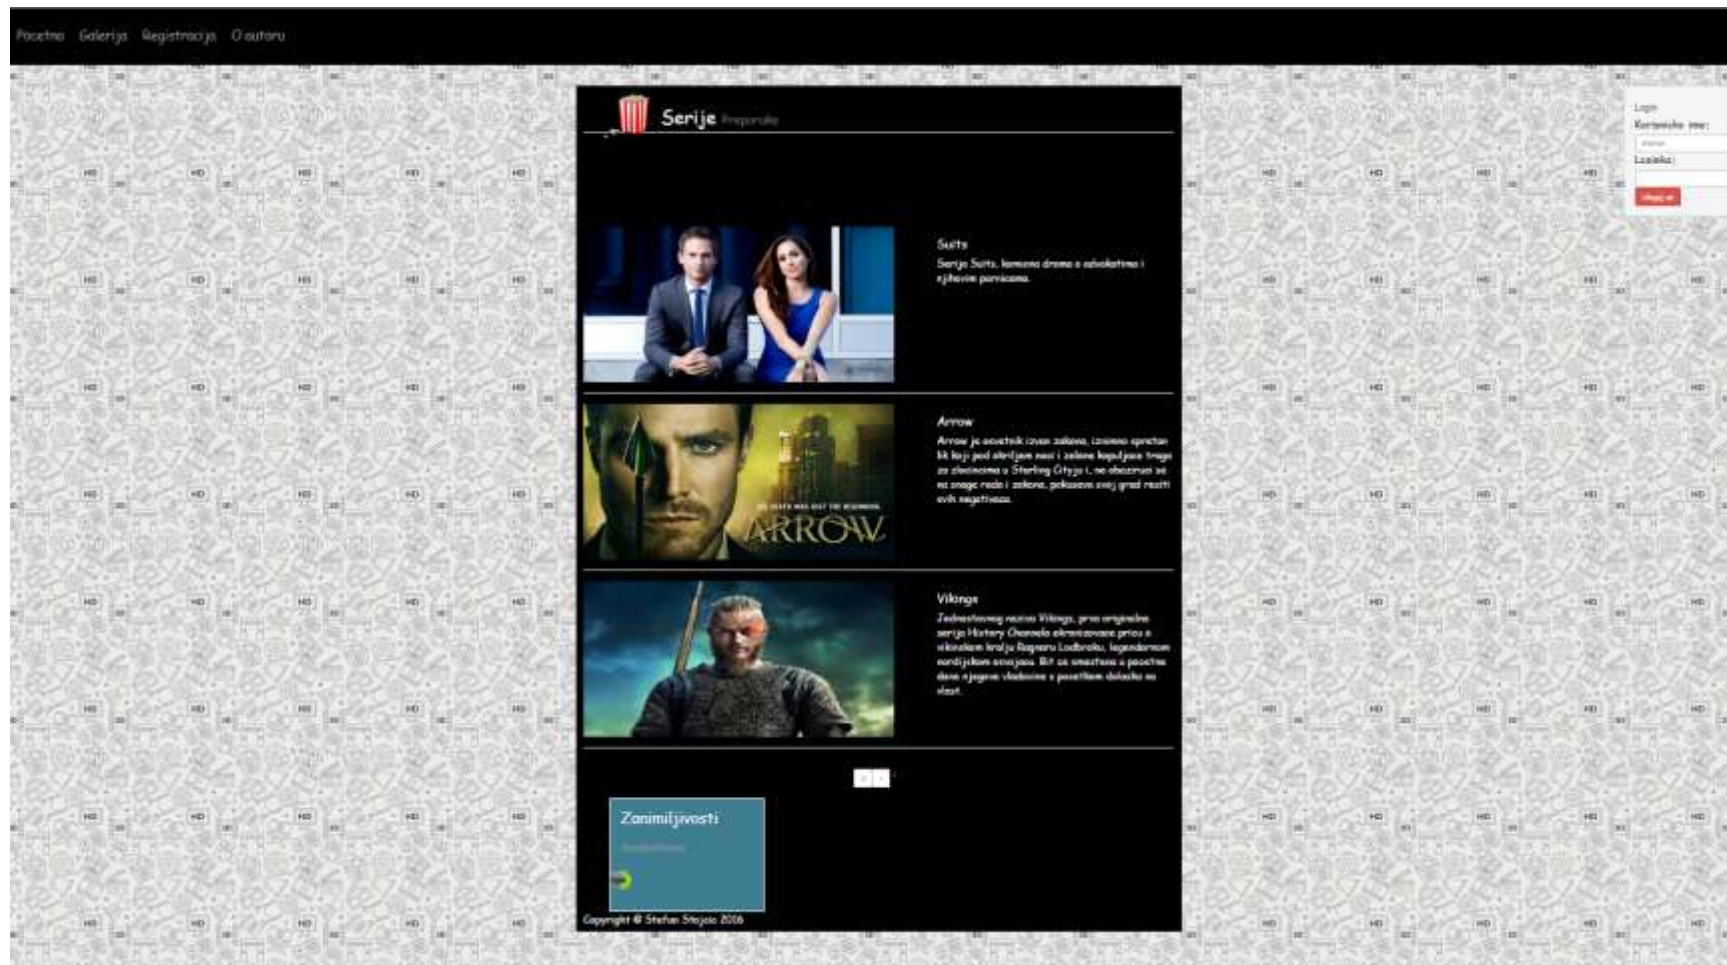

Sajt je zamisljen kao aplikacija za preporucivanje serija.

Na početnoj strani se nalazi meni, kompletna struktura menija se vuče iz baze podataka, a određeni linkovi se prikazuju u zavisnosti od uloge korisnika. Ukoliko je korisnikova uloga admin, dodatno mu se prikazuju linkovi Administracija i Log out, a ako je uloga korisnik, Profil i Log out. Takodje, na pocetnoj stranici se nalazi jedan vid ankete(u futeru), koja je uradjena pomocu ajaxa. Klikom na slicicu prikazuje se sledeća vest. Ne postoji striktan redosled pokazivanja vesti, tj. prikazuju se random. Tekst koji se prikazuje na pocetnoj strani, koji izbledi nakon dve sekunde radjen je preko javascripta. On se nalazi u futeru. Na svim stranicama postoji login forma. Da bi se korisnik ulogovao, mora prvo biti registrovan. Ukoliko je logovanje uspesno, korisnik se u zavisnosti od uloge redirektuje na odredjenu stranicu. Login forma je uradjena pomocu sesija.. Registracija je odradjena sa regularnim izrazima, koriscena je biblioteka form_validation, tako da se podaci nece upisati u bazu podataka ukoliko forma nije popunjena u skladu sa pravilima. Na pocetnoj strani se takodje nalazi I paginacija koja je uradjena pomocu Codeigniter biblioteke za paginaciju, prikazuju se serije koje je uneo admin ili korisnik. Ukoliko se korisnik uloguje na sajt, bice redirektovan na stranicu gde moze da izabere da li zeli da unese seriju ili da vidi serije koje je on uneo. Takodje, korisniku je omoguceno i da brise svoje postove. Ukoliko se admin uloguje na sajt, moci ce da unosi,brise,edituje sadrzaj. Na stranici na koju je admin redirektovan nalaze se linkovi I on odredjuje da li zeli da upravlja serijama, galerijom, anketama ili korisnicima. Galerija je radjena pomocu Codeigniter biblioteke image_lib, kada se izvrsi upload slike, odradjuje se thumb iste.Thumbovi se prikazuju kao linkovi slika, koriscen je JQuery plugin za lightbox.Takodje omogucen je upload slika u galeriju.

Korišćeni jezici	HTML,CSS,SQL,PHP,JavaScript
Korišćeni HTML šabloni (framework-ci)	-Bootstrap https://startbootstrap.com/template-overviews/1-col-portfolio/
Korišćene biblioteke i njihovi url-ovi odakle ste ih preuzeli	-Jquery -lightbox plugin
Korišćene biblioteke iz framework-a	Codeigniter
Korišćene php biblioteke van fremework-a	
Koje funkcionalnosti su realizove putem AJAX-a	Brisanje korisnika admin panelu, vrsta randoma ankete na pocetnoj stranici.
Navešti lokacije gde je napisan AJAX kod (fajlovi ili delovi html stranice)	Nalazi se u view-u footer. Kao i u js fajlu Ajax.
Navešti lokacije gde je napisan sopstveni javaScript kod (fajlovi ili delovi html stranice)	Napisan je takodje u footer-u.
URL sajta/aplikacije	http://serije.byethost3.com/
Pristupni parametri	Kaa admin: admin-admin123 Kao korisnik: stefan-stefan123
